```
#include <bits/stdc++.h>

using namespace std;

int main()
{
    int n,m;
    string ans="",op,cpy,temp;
    cin>>n;
    while(n--){
        cin>>op;
        if(op=="Add"){
            cin>>m;
            cin>>temp;
            ans+=temp;
        }else if(op=="Del"){
            cin>>m;
            ans=ans.substr(0,ans.size()-m);
        }else if(op=="Copy"){
            cpy=ans;
        }else if(op=="Paste"){
            ans+=cpy;
        }
    }
    cout<<ans;
    return 0;
}
```
